Elements by AXM

- **Instant SMS**
- **Color Manager**
- **Spell Check**
- **E-mail Center**
- **Alerts +**
- **Document Handling +**
- **Server Monitor**

What is AXMarketplace?

Why Did We Create It?

As individuals that have been involved in the growth of Microsoft Dynamics AX for over 10 years, yes a few of us date back to the pre 2.0 days, we have a great respect and excitement for the success of Dynamics AX within the Microsoft community.

As we have watched AX grow into a systems that run at 1,000's of companies, we have realized the time is now to launch AX Marketplace.

AX Marketplace is a new type of provider in the Dynamics AX Community, we are:

- Not a Vertical Solution ISV
- Not a VAR
- Not a Professional Services Firm
- Not Microsoft

So what do we provide.....

AX Marketplace builds AX Productivity Tools that are:

- Ready to run right out of the box
- Quick to implement w/Fix Fee Available
- Require minimal configuration
- Quality controlled solutions
- Fully documented solutions
- Customer requested and approved

- **360 Views**

Each Element's price is very reasonable, much lower than what it would take to develop these solutions internally or on a custom basis, and each is warranted for future releases of AX.

- **more to come..**

Go to our website, get your login and you will see how we have priced our Elements to assist your company to achieve a quick ROI.

Instant SMS by AX Marketplace

Today's business runs in real time, why not contact your Customers, Vendors and even your employees via SMS (Text) direct Dynamics AX. With off the shelf integration, this Element provides the ability to communicate as desired with a complete audit trail of the communications stored within Dynamics AX.

Color Manager by AX Marketplace

Ever wanted to provide your users a visual clue to easily identify what company or instance of AX they are working. Color Manager does this for you easily, thus preventing users from entering or changing data in the wrong company. We allow the company administrator to pick a background color that is unique for each situation, which considerably reduces the risk of wrong company data entry. This Element can be used company wide across all domains.

Spell Check by AX Marketplace

Our Spell Check Element allows Dynamics AX users to check the spelling on documents like Sales Orders, Purchase Orders, Quotations, etc. It also validates spelling in Master Databases like the Customer Master, Item master, Vendor Master, etc

This AX Element gives you the flexibility to choose which form or screen to spell check. You can also selectively choose text fields in a record for validation. Once it finds a potential misspelled word, it provides suggestions and let you either

change the word, change all, ignore the word, ignore all, add the word to the dictionary, or undo changes.

E-Mail Center by AX Marketplace

E-Mail center allows you to integrate e-mail from your Customers and Vendors within Dynamics AX. This process can be done automatically based upon user defined criteria and workflow, or done manually by the E-Mail manager. All e-mails may be viewed by the individual's responsible and, if desired, saved to document handling in AX easily.

Microsoft Convergence 2010 in Atlanta

If you are attending Convergence and would like to learn more about AX Marketplace, please look for Frank Vukovits or Brad Dennison. Both will be at the AXUG booth #514 at various times during the conference and will be at several sessions, either presenting or in attendance. If you want to schedule a time to meet, both are in Convergence Connect tool, or you can leave them an e-mail with your questions. To contact them via e-mail use the links below:

[Click here to send Frank an E-mail](#)

[Click here to send Brad an E-mail](#)

As an additional incentive - they will be carrying special Convergence Promotion Entry forms for a drawing where we are giving out two prizes:

A) Free Element of your choice !

B) You can design your own Element and Name It !

How do we get our Elements !

Our Elements come from suggestions from our customers, VARs and our experience with Dynamics AX. If you have any suggestions, please provide one, either e-mail us , or go to AX Marketplace.com and visit our suggestion box.

At this time we have a pipeline of over forty Elements in our Factory's schedule, and looking for more. Our development and scheduling of Elements is based upon customer request. Why do we call it a Factory? As with today's modern

day factory, we believe in having a flexible model, yet at all times quality control and support after the sale are the most important. The leaders of our Factory team have both managed large (over 300 users) IT organizations for AX, as well as have authored books on Quality Control in the Development Process for Dynamics AX. We take the Factory process very seriously and have a nine step production process that utilizes the Microsoft Sure Step implementation methodology. Your Elements By AX Marketplace will work as documented and promised !
